

FlashTrax XT

Today's Digital Lifestyle Portable Multimedia Player/Recorder

Transfer, store and share your videos, pictures, audio and data files with FlashTrax XT, the patented, palm-sized, portable multimedia player and video recorder that travels anywhere. Transfer thousands of high resolution images and hours of video for entertainment. Safely capture and store photos from flash memory cards using "one touch" copy key. Download multimedia files onto the built-in hard disk drive.

Download and watch videos on the flip-top 3.6" color LCD or TV

FlashTrax XT records and plays television shows or movies on the built-in color LCD. Connect FlashTrax XT to a TV or video projector for viewing with family and friends. FlashTrax XT plays digital video formats, including MPEG-4, DivX, WMV9 and XviD, and is adaptable to both NTSC and PAL television output systems. With FlashTrax XT, you can view movies or videos at your desk, in your car or on a plane.

Transfer and store photos from flash memory cards, view on the 3.6" LCD or TV

View digital images with controls to zoom and pan. A slide show feature previews photos automatically and allows you to add background music. Connect FlashTrax XT to your TV (NTSC and PAL support) to share your photos with friends. A Compact Flash reader slot is built in and, with adapter, FlashTrax XT transfers images from all popular flash memory cards.

Record and listen to music and MP3s

Use the convenient Hi-Speed USB port to connect FlashTrax XT to your PC and download thousands of songs to take with you. Listen to your music via the built-in speaker, with headphones or connect FlashTrax XT to external speakers. Create your own music play list to enjoy again and again. In addition, use the built-in radio to listen to your favorite FM station and capture your favorite music for later enjoyment.

Transfer data files

Transfer the images you've collected from FlashTrax XT to your PC using the Hi-Speed USB port, and save edited photos or any other type of file back onto your FlashTrax XT.

Additional functionality

FlashTrax XT's built-in operating system is upgradeable. That means future enhancements can be added as they are made available through the SmartDisk web site.
